THE *Burke* GOLF COMPANY
NEWARK, OHIO, U.S.A.

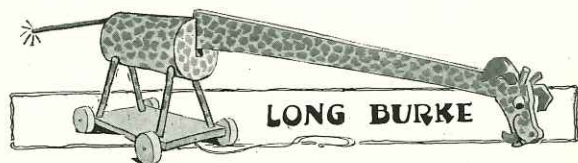

The Long Burke Ball

JUST as the name implies the Long Burke ball is a distance ball. It is a high-powered ball that finds instant favor with the long hitters and with players who want distance to their shots.

The method of construction of the Long Burke is radically different from that of any other ball made, and the added distance due to this construction is conclusive proof that it is scientifically sound and a decided advance over any other method ever used. Tested by every conceivable device for driving power the Long Burke proves to be all that is claimed for it. It does possess more distance and has a "click" and feel that the best golfers demand of a ball.

THE *Burke* GOLF COMPANY
NEWARK, OHIO, U.S.A.

The Long Burke Ball

TO MEET the popular demand for a long distance ball, the Burke Golf Company has developed the Long Burke—proclaimed the longest driving ball on two continents. Into it has been built distance to an exceptional degree.

In developing distance in the Long Burke, trueness of flight and roll was a paramount feature stressed in its manufacture.

It carries farther off both wood and iron clubs and possesses roll that means extra yards to every shot.

A trial of one Long Burke means its adoption by all classes of players.

NEWARK, OHIO U.S.A.

The First Guaranteed 50c Ball

The Burke 50-50 the guaranteed 50c ball has won the acclaim of the golfing public. This ball, the first 50c one to be guaranteed, met with instant popularity and is now without question the fastest selling 50c ball in the country.

Try it to be convinced how good a 50c ball really can be. Remember, if it cuts thru, cracks or gets out of shape in 50 holes of play, send it back; it will be replaced without quibble.

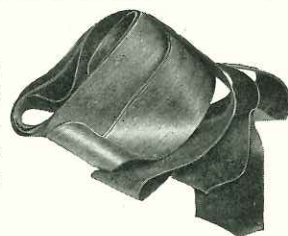

THE *Burke* GOLF COMPANY
NEWARK, OHIO U.S.A.

How the 50-50 is Made

A Burke 50-50 is perfectly balanced. The center is a perfect sphere of pure resilient rubber. It insures true putting and straight flight.

Pure Para tape rubber is used in the first winding of a Burke 50-50. This rubber is one inch wide and is stretched eight times its length when wound.

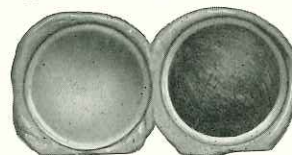

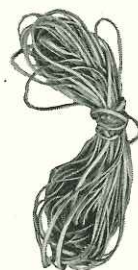

The soft rubber center is wound by hand with one inch Para tape rubber. This is wound hard and must pass certain tests for hardness because the long flight of the 50-50 depends largely upon this.

The Para thread rubber in the 50-50 is the highest grade to be obtained. Wound at maximum tension, 30 yards of this rubber is stretched nine times its length in winding.

Next the center is wound by latest improved machines with smaller Para thread rubber at maximum tension. It is the improved winding principles that have added many yards to the flight of the 50-50.

The wound core is then placed in the new bleached cover "cups" and vulcanized. An important operation since the cover cured too hard deadens the ball and if too soft it cuts easily.

The 50-50 as it comes from the mold. It is trimmed and smoothed; tested for resiliency and hardness and inspected for imperfections in vulcanizing. It is next painted with successive coats and when thoroly dried is ready for play.

NEWARK, OHIO U.S.A.

Burke's

TRUE TEMPER

THE BURKE TRUE TEMPER steel shafts are new in the realm of golf. They are different and superior to any steel shaft heretofore offered. They are made different from other steel shafts. The braced-girder effect gives them the minimum of weight, but the necessary stiffness. They give greater distance because the amazing feeling of 'life' in them gives added confidence and the desire to "let out" on all shots.

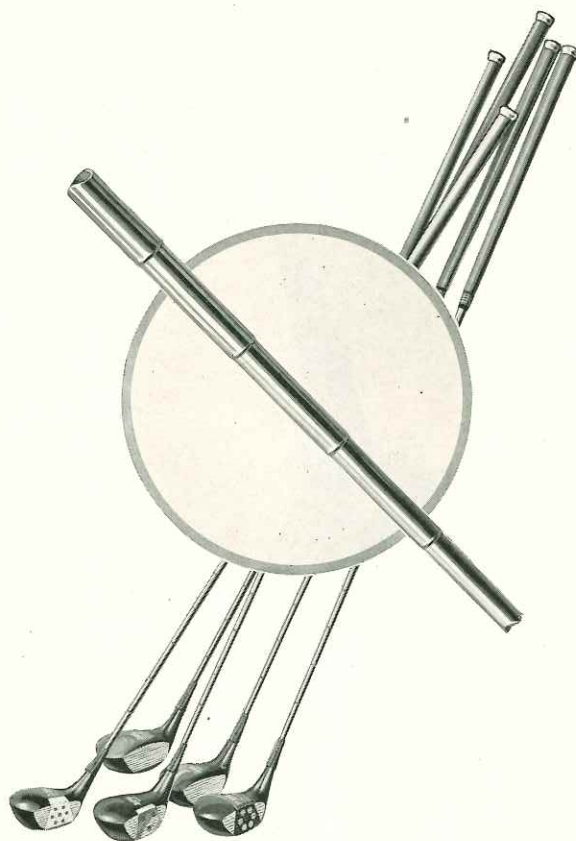

Chrome-Molybdenum Steel Shafts

BURKE TRUE TEMPER steel shafts are most durable. They are made from pierced billets of Chrome-Molybdenum steel—the strongest and toughest alloy known to science.

BURKE TRUE TEMPER shafts are a contribution to golf history. They make lower scoring natural, because the added confidence in them, once they are used, gives greater distance and straighter shots.

THE *Burke* GOLF COMPANY
NEWARK, OHIO, U.S.A.

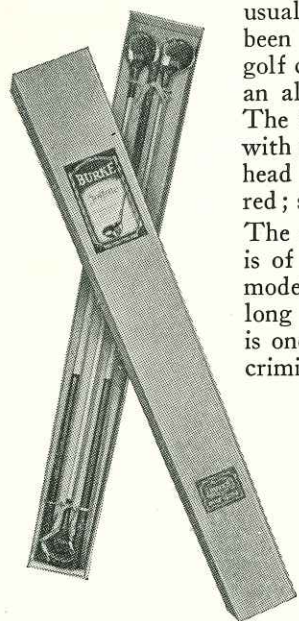

True Temper Steel Shafts

NOT only do the "rings" or reduction offsets in BURKE TRUE TEMPER shafts give them greater strength, but they give a cushioned "snappy" feeling to the shot.

In TRUE TEMPER shafts there is an absence of the heavy vibrations and shocks found in the smooth, straight, tapered shafts. Where the surface is unbroken, vibration is transmitted directly from the impact to your hands. The TRUE TEMPER shaft opposes vibrations with an uneven surface. The seventeen complete rings or reduction offsets, a distinctive feature, reduce vibrations to a minimum. The hit has wonderful smoothness and gets the ball away with that pleasant feel of a perfect shot.

The Golfrite Wood Club

THE GOLFRITE is a perfect combination of beauty and unusual playing qualities. It has been proclaimed the aristocrat of golf clubs. The head is made with an aluminum back and sole plate. The face is inlaid with ivory, fitted with seven attractive red pegs. The head is stained a beautiful cherry red; sole stained and varnished.

The model used in the GOLFRITE is of medium dimensions. It is a model that finds favor with the long hitter. The club in general is one that is preferred by the discriminating golfer.

Supplied with Burke True Temper steel shafts or selected hickory shafts; in single clubs or in matched sets of two or three; Driver, Brassie and Spoon.

Price, single club
\$15.00

The DeLuxe Wood Clubs

THE Burke DeLuxe is a club that is the choice of those golfers who are particular about their clubs. None but the highest quality material is used in this club.

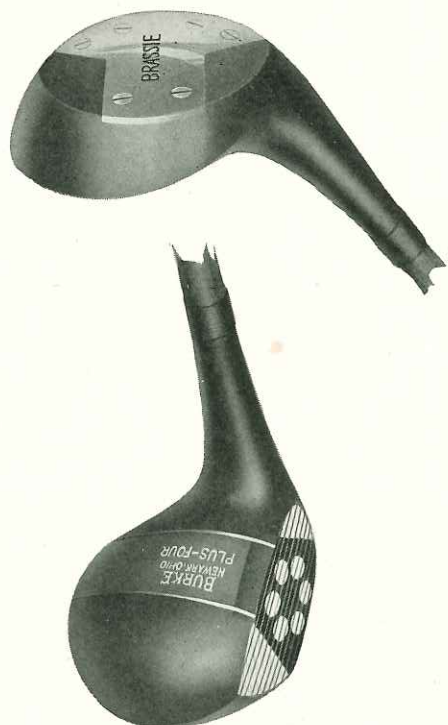

The face of the DeLuxe is made of resilient black fiber, held securely with seven bronze screw plugs. There is no coming out or working loose; *they are screwed in.* The back and sole plate are of aluminum. The head is stained a dark mahogany. The sole is waxed.

This club has long been a popular one in the Burke line. It is the choice of professional and amateur alike. The model is a trifle upright. The general appearance is one that appeals to all golfers.

Supplied with Burke TRUE TEMPER steel shafts or selected hickory shafts in matched sets of two or three; Driver, Brassie and Spoon, or in single clubs.

Price, single club ----- \$12.00

The Plus Four Wood Clubs

A CLUB quite different in design. The PLUS FOUR wood club is without question one of the most attractive clubs to be found today. It is made with an inset tapered brass sole plate. The face is of black fiber held securely with six aluminum screw plugs. The finish of the head is very attractive, it being stained a beautiful dark mahogany with a cherry-red stripe marked with white lines.

In addition to possessing all the refinements in appearance for which Burke clubs are justly noted, the PLUS FOUR is perfect in design. It is a golf club that any professional or amateur will appreciate for its playing features.

The PLUS FOUR is supplied with Burke TRUE TEMPER steel shafts or selected hickory shafts in matched sets of two or three; Driver, Brassie and Spoon, or in single clubs.

Price, single club, Steel shaft.....\$12.00
Hickory shaft..... 10.00

The Burke Autograph Wood Clubs

THE BURKE AUTOGRAPH has long been a popular model in the BURKE line. It is a model that appeals to all golfers. The head is of medium size.

The AUTOGRAPH is made with an inset tapered brass sole plate; the face is of black fiber held with six bronze screw plugs. The head is finished with a walnut stain with natural stripe.

It is a specially constructed club thruout and made for the golfer who appreciates an attractive club and at the same time, one that is designed to incorporate every correct playing feature. The golfer who buys a BURKE AUTOGRAPH is assured of getting full value.

THE AUTOGRAPH is supplied with non-twisting BURKE TRUE TEMPER steel shafts or selected hickory shafts in matched sets of two or three; Driver, Brassie and Spoon, or in single clubs.

Price, single club, Steel shaft.....\$11.00
Hickory shaft..... 9.00

Zenith Wood Clubs

THE ZENITH model wood club is one of the most practical wood clubs ever designed. It is outstanding in popularity—distinctiveness—playing features—common sense, mechanical construction and appearance. No fancy trimmings—nothing to give trouble—just a good club, built to lower scores.

The ZENITH is made with an aluminum back and sole plate. Plain face. Head finished in walnut stain. Sole stained and varnished. Only the best of selected persimmon wood used in the head of the ZENITH model. It is made only with BURKE TRUE TEMPER steel shafts.

It may be had in matched sets of two or three clubs; Driver, Brassie and Spoon, or in single clubs.

Price, single club, Steel shaft.....\$10.00

Ranger Wood Clubs

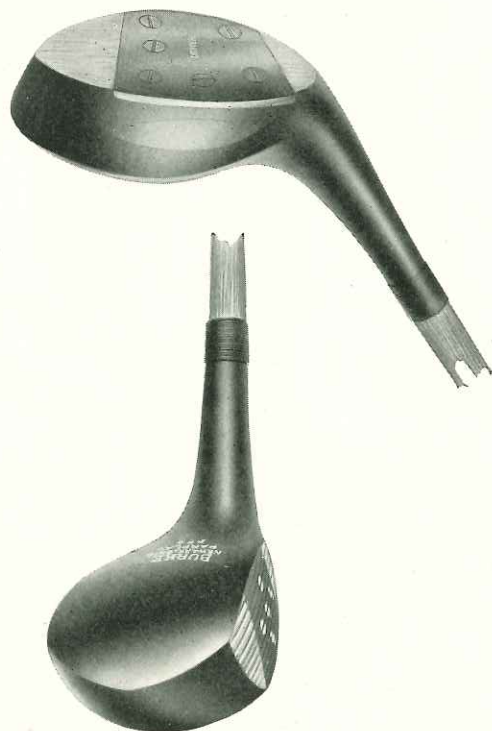

THE model in the RANGER wood club has been changed. The head is a trifle longer than the one used last year and is more upright. The method of construction of the RANGER is one that has always been in favor.

The RANGER is made with a straight aluminum sole plate and aluminum face. The face is held with aluminum screw plugs. The head is finished in an attractive dark cherry stain. The sole is stained and varnished. Superb finish and workmanship. Complete harmony of parts and weights insures rhythm, so essential in timing the shot. It is a very serviceable club.

Supplied with BURKE TRUE TEMPER steel shafts or with selected hickory shafts; Driver, Brassie and Spoon.

Price, Steel shaft.....\$10.00
Hickory shaft..... 8.00

Farplay Wood Clubs

THE BURKE FARPLAY wood clubs offer exceptional value and golfers have been quick to realize this. They are medium priced but offer distinctive features.

FARPLAY models are made with a black fiber face held with bronze screws. The sole is fitted with a keystone shaped brass sole plate. The materials used in the construction of the FARPLAY are highly selected quality. These clubs in appearance and design compare favorably with many higher priced clubs on the market today. The models used are popular.

Two different models may be had in these clubs.

P 20 Driver	P 70 Driver
P 20 Brassie	P 70 Brassie
P 20 Spoon	P 70 Spoon

The P 70 model is shown in the illustration.

Price, Steel shaft	\$9.00
Hickory shaft	7.00

Victory Wood Clubs

THESE are new model wood clubs in the BURKE line. The models are new and the method of construction is different from that of other clubs in the line. They are made with plain-faces and with an inset tapered brass sole plate. The head is stained with a walnut finish. The sole is stained and varnished.

The VICTORY wood clubs offer a better value than is found in most clubs. There is nothing about them to give trouble and the models used are all practical. There is nothing freakish or extreme in the construction or appearance of the VICTORY wood clubs.

There are three popular models in the VICTORY line.

V 20 Driver, Brassie and Spoon
V 60 Driver, Brassie and Spoon
V 70 Driver, Brassie and Spoon

The V 70 model is illustrated.

Price, Steel shaft	\$8.00
Hickory shaft	6.00

Burke Grand Prize Wood Clubs

THE BURKE GRAND PRIZE wood clubs have for years been the leading moderate priced clubs in the country. They are made with high quality hickory or steel shafts and from persimmon heads of high quality. They have a plain face but with a straight Aluminum sole plate, the latter in other makes of clubs being only found in those selling at a higher price. Heads are finished in a mahogany stain. Sole waxed.

The models in the GRAND PRIZE line:

40 Driver 70 Driver 320 Driver 844 Driver
42 Brassie 72 Brassie 322 Brassie 846 Brassie
43 Spoon 73 Spoon 323 Spoon 849 Spoon

Price, Steel shaft\$7.00
Hickory shaft 5.50

Lady Burke Wood Clubs

LADY BURKE wood clubs are not simply light men's clubs, but are made special to fit women's needs.

Straight Aluminum sole plate. Ivor face with seven black pegs. Walnut stain with natural stripe. Sole waxed.
S 40 Driver with Brassie and Spoon to match.

Price, Steel shaft\$10.00
Hickory shaft 8.00

Inset tapered brass sole plate. Black fiber face with five bronze screws. Dark cherry stain on head. Sole stained and varnished.

V 844 Driver with Brassie and Spoon to match.

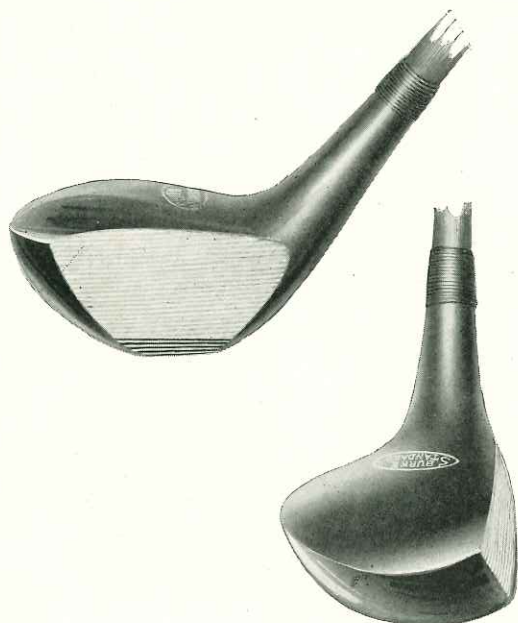

Price, Steel shaft\$8.00
Hickory shaft 6.00

Plain face and head. Black fiber slips on sole of Drivers. Full brass plates on Brassies and Spoons. Heads finished in mahogany.

Price, Steel shaft\$7.00
Hickory shaft 5.00

Burke Standard Wood Clubs

THE BURKE STANDARD wood clubs offer the golfers a line of clubs that are indeed hard to duplicate. They represent uniform quality and standard workmanship, material and finish.

While the material used in BURKE STANDARD wood clubs is not of the same high quality used in the more expensive clubs, it is of good quality and the golfer is insured of clubs that will give full value for the money.

The hickory shafts in BURKE STANDARD wood clubs are air-seasoned two years and the persimmon block eighteen months, the same as in higher priced clubs.

An assortment of Drivers, Brassies and Spoons are available, in either right or left hand. When so ordered, clubs with the proper weight and shaft lengths for women's needs will be furnished. Supplied in hickory shafts only.

Price\$3.50

Burke Columbia Wood Clubs

FOR those wishing to start the game with low priced clubs, none better than the COLUMBIA woods shown here can be found. They offer the beginner or those wishing to invest modestly a substantially and attractively built club.

In order to supply a good club at the price of the COLUMBIA, it is necessary to limit the models and put each on a quantity production basis. By this means a club that offers no apology can be supplied. The dealer or professional who is interested in selling clubs in sets to beginners will find in the BURKE COLUMBIA just what he is looking for.

Price\$2.00

Burke Stainless Irons

STURDIE TEE

JUST as the name implies, the BURKE STURDIE tee is one that will withstand rough usage. It is designed that way. Notice how there is a gradual taper from the top to the point. It is built for rugged treatment—almost impossible to break. The method of construction has one decided advantage. The small knob near the point keeps it in the ground.

Red or yellow. Price a box.....25c

The New belted coat
style Green Jacket

Zip Lock Rain Jackets

THE BURKE ZIP lock rain jacket is replacing the old style bothersome jacket. No trouble—no fussing—just zip and it is buttoned. The BURKE ZIP lock jacket is modeled along the latest lines. Made with roomy raglan shoulders, well ventilated. The material is high grade rubberized silk—the kind that doesn't rustle and crackle when you play a shot. Made in green and brown. Blouse or coat style.

GOLF RULES

ADVICE

You may ask advice only from your caddie, your partner or your partner's caddie. In Match play the penalty is the loss of the hole; in Stroke competition, disqualification.

BALL

Accidentally Moving It: If a ball in play moves after you have grounded your club in addressing it, you shall be penalized one stroke. This penalty is also imposed if ball, while in play in a hazard, moves after you have taken your stance. If you or your caddie accidentally move a ball in play, a stroke shall be added to your score. This rule also applies to your ball moved by you or your caddie when being searched for.

Addressing It: If you touch your ball with your club while addressing it—and the ball does not move—there shall be no penalty.

Changing Unfit Ball: Should your ball split into separate pieces, you may drop another ball where any piece lies. If the ball breaks or becomes unfit for play, it may be changed if you tell your opponent. Mud on a ball does not render it unfit for play. A ball in play may not be cleaned under penalty of disqualification in medal play and the loss of the hole in match play. Special local rules may except these penalties.

Dropping It: You face the hole, stand erect and drop the ball behind you over your shoulder. Loss of the hole shall result from a breach of this rule. If the ball so dropped rolls into a hazard, it may be re-dropped without penalty. No penalty is incurred if the ball touches you when you are in the act of dropping it.

Displaced: If your ball knocks your opponent's ball into the hole, your opponent shall be considered to have holed out at his last stroke. If any agency outside a match except wind, displaces a ball while at rest, a ball shall be dropped as near as possible to where it lay. If the ball is displaced on the putting green it shall be replaced. No penalty in either case.

Identifying It: With your opponent's consent, you may lift a ball in play for identification purposes. It must be carefully replaced.

Interference With Ball: If your opponent, his caddie or his clubs interfere with your ball when in motion, your opponent's side loses the hole.

Lifting It: When two balls lie within a club length of each other through the green or in a hazard, the ball lying nearer the hole may, at the option of either player, be lifted until the far ball has been played. The removed ball shall then be replaced as near as possible to its original position. No penalty shall result from the accidental moving of either ball in complying with this rule. The moved ball shall be replaced.

Lodged in Anything Moving: A ball shall be dropped if the player's ball lodges in anything moving. Should this occur on the putting green, a ball shall be placed, without penalty, at the spot where the ball lodged in it.

Looking For It: Bushes, long grass, etc., may be touched by the player only so far as it is necessary for him to find his ball.

Lost or Unplayable: If not found five minutes after search is begun a ball is "lost".

A ball may be teed if the stroke was played from the teeing ground. In other cases the ball must be dropped. When you lose your ball—or consider it unplayable—you shall add a penalty stroke to your hole score and play another ball as near as possible to the spot where the ball was found to be unplayable or was lost.

On Putting Green: In the case of two balls lying within six inches of each other, the ball closer to the hole may, with the consent of player or opponent, be lifted until far ball is played, when it shall be replaced as near as possible to its original position. No penalty shall be incurred if either ball is accidentally moved in complying with this rule. The ball so moved shall be replaced.

Opponent's Accidentally Moved: The opponent whose ball has been moved by your ball through the green or in a hazard, may if he chooses, drop a ball without penalty as near as possible to the place where his ball lay. This must be done before either side plays another stroke. If you or your caddie accidentally touch or move your opponent's ball in searching for it, there shall be no penalty. If the ball was moved, it must be replaced.

Opponent's on Green: The player, whose ball lies on the putting green, must not play until his opponent's ball is at rest under penalty of loss of the hole.

Out of Bounds: When the greater part of a ball lies out of bounds, the ball is considered out of bounds. A player may stand out of bounds in playing a ball lying in bounds. When your ball lies out of bounds, you shall add a penalty stroke and play your next

shot as close as possible to the spot where the ball which was out of bounds was played. A ball may be teed if the stroke was played from the teeing ground. In other cases, a ball shall be dropped.

Outside of Match: When a stroke is played with a ball not in the match, you are not penalized if you discover the mistake and tell your opponent before the latter has played his next stroke. Your side shall lose the hole if the mistake is discovered after your opponent has played his next stroke.

Playing Opponent's: Should you play your opponent's ball, your side loses the hole unless your opponent plays your ball, in which case all is fair. But the hole must be played out with the balls thus exchanged.

Playing Wrong One: In stroke competition you are disqualified, if you play two consecutive strokes with the wrong ball. There is no penalty if you play one stroke with a ball not your own and then play your own ball. A breach of this rule shall result in disqualification. If the above occurs on the putting green, the ball shall be replaced.

Provisional: If you play your ball to a part of the course where it is apt to be lost or unplayable, in order to save time you may at once play another ball, dropping it as near as possible to where your first ball lay and adding a penalty stroke. If the first ball is neither lost nor unplayable, it shall continue in play without penalty.

Stopped: Should any agency outside of a match stop or deflect a ball in motion, the ball shall be played from where it lies.

Striking It: The loss of the hole shall result if the player pushes, scrapes or spoons the ball instead of striking it squarely.

Touching It: When a ball is in play it must not be touched except in addressing or in identifying. A breach of this rule will cost the player a penalty stroke.

On Lip of Cup: If your opponent plays to the lip of the cup after you have holed out, you may not knock the ball away. Your opponent, however, shall play his next stroke without delay, if so requested.

BREACH OF RULE

A breach of any rule shall result in the loss of the hole in match play. The penalty shall be two strokes in medal play except where Special Rules specify otherwise.

CASUAL WATER

If your ball lies in, or is lost in casual water through the green, you may drop a ball as near as possible to the spot where the ball lay and within two club-lengths of the margin and no nearer the hole. No penalty. If the re-dropped ball rolls into water, it may again be dropped without penalty.

CASUAL WATER ON PUTTING GREEN

In the case of a ball lying in casual water, or casual water lying between the ball and the hole, the ball may either be played from where it lies, or it may be placed two club-lengths directly behind the spot from which it was lifted, or in the nearest position to the spot—not nearer to the hole—which affords a putt to the hole without casual water intervening. No penalty.

CASUAL WATER AND THE STANCE

If casual water interferes with your stance, the ball may be treated as if it lay in casual water.

CLAIMS, AND DISPUTES

In the case of a dispute, a claim must be made before the players tee off from the next hole. If a dispute arises on the last hole, the claim must be made before they leave the putting green.

FLAG STICK AND HAZARDS

In approaching the hole either side may have flag stick removed. If the flag stick, which has been removed by you, or either of your caddies, is struck by your ball, your side shall lose the hole. If your ball rests against a flag stick which is still in the hole, you may remove the flag stick. Should your ball fall into the hole, you shall be considered to have holed out at your last stroke. In medal play a ball striking or being stopped by the flag stick or person standing at the hole shall cost the player two strokes. In medal play, should the flag stick or person standing at the hole stop, or be struck by a ball which was played 20 yards from the hole, the player shall be penalized two strokes. You must not improve the lie of your ball in, or touching a hazard. The club must not touch the ground nor anything be moved except steps or planks which have been placed in the hazard by the Green Committee for the player's convenience. If the ball moves while the steps or planks are being removed, it must be replaced. No penalty.

LOCAL RULES

Local conditions, affecting the proper playing of the game, often necessitate the drafting of Local Rules. These may cover such obstructions as trees, hedges, walls, etc.; the presence of rabbit scrapes, hoof marks or other damage caused by animals; the existence of mud; and any other conditions peculiar to the course and calling for special treatment. Players should familiarize themselves with their Local Rules.

LOOSE IMPEDIMENTS

Obstructions not fixed or growing such as worm casts, dung, mole-hills, snow and ice are called "loose impediments". These may be lifted from the putting green regardless of the position of your ball. If the ball moves after either player, his partner or either caddie has touched an impediment within six inches of the ball, the player shall be penalized one stroke. A loose impediment a club length from the ball, and not in or touching a hazard, may be removed without penalty. But if the ball moves after the impediment has been touched by you, your partner or either caddie, you shall be penalized a stroke.

OBJECTS FIXED AND GROWING

Anything fixed or growing shall not be moved, bent nor broken by you before striking at a ball in play except for the necessity of fairly taking your stance in addressing the ball or in making a backward swing. While the club may be grounded *lightly* it may not be pressed into the ground. Loss of the hole shall be the penalty for breach of this rule.

Drawing the club back and forth across the line of play entails the loss of the hole in match play, while a penalty of two strokes shall be imposed for breaking this rule in stroke competition.

OBSTRUCTIONS

These, including such things as flag stick, guide-flag, moving guide-post, wheelbarrow, roller, grass-cutter, etc., may be removed. If the ball moves in so doing, it shall be replaced without penalty.

OPPONENT'S SCORE

You may at any time ask your opponent the number of strokes he has played. Wrong information—unless it is corrected before you have played another stroke—results in your opponent's losing the hole. The penalty in stroke competition is disqualification.

PRACTICE STROKES

Before a ball is in play, a player may take as many practice swings as he likes if he is far enough away from the ball so that it is perfectly obvious that he is not trying to strike the ball. There is no penalty for taking a practice swing through the green. Etiquette requires that such strokes be made at best a club's length from the ball and not facing the hole. If a player takes a practice swing in the rough and breaks or cuts grass or other vegetation near his ball, he loses the hole at match, and two strokes at medal play.

PRIORITY ON COURSE

Pairs, threesomes and foursomes have precedence over any other kind of match and are entitled to pass them. If a match loses more than one clear hole on the players in front, it may be passed, on request. A single player must give way to any other kind of match. A match playing a whole round, may pass a match playing a shorter round.

PUTTING GREEN

This includes all ground within twenty yards of the hole, with the exception of hazards.

PUTTING OUT OF TURN

Should a competitor in match play, whose ball is closer to the hole, putt out of turn, his ball shall be replaced immediately. Disqualification for both competitors shall result in the case of a breach of this rule.

STYMIES

If, on the putting green, your opponent's ball lies in the line of your putt to the hole, you are laid a stymie, provided the two balls are not within six inches of each other. Stymies are played in single matches and foursomes (not four-ball matches). If the balls lie within six inches of each other, the player of the nearer ball must lift his ball whether requested or not. The ball lying nearer the hole is lifted on request of either player in medal play, three-ball, best-ball or four-ball matches.

NEWARK, OHIO U.S.A.

SURFACE IRREGULARITIES

Any irregularities of surface which could affect your stroke may not be pressed down by you or by caddies. You may, however, always plant your feet firmly when taking your stance. Loss of the hole shall result from a breach of this rule.

TEEING GROUND

If a ball not in play falls off—or is knocked off a tee by you in addressing it, it may be re-teeed without penalty. No penalty is incurred even if the ball is struck when moving. Your opponent may at once recall your ball if played from outside the limits of the teeing-ground. You may re-tee such a re-called ball without penalty.

THROUGH THE GREEN

This applies to all playing ground except the putting-green of the hole that is being played, and all hazards.

WATER AND HAZARDS

If your ball is in—or lost in a water hazard, or in casual water in a hazard, you may drop a ball under penalty of one stroke. The ball must be dropped either behind the hazard, with the spot where the ball crossed the margin of the hazard between you and the hole, or in the hazard, keeping the spot at which the ball entered the water between you and the hole.

WRONG INFORMATION

If you play your opponent's ball because of wrong information given by your opponent or a caddie, there is no penalty. The mistake can be rectified if discovered before your opponent plays, by dropping a ball as near as possible to the place where his ball lay.
